EDUCATION

- Marathwada Mitra Mandal's College of Engineering Pune, India
B.E. in Artificial Intelligence and Data Science (CGPA: 9.21) 2022 – 2026

EXPERIENCE

- Scrobits Technologies LLP Nov 2025 - Feb 2026
AI Intern Pune, India
 - Built and shipped **MahaAMRUT**, a production **multi-agent GenAI system** for Maharashtra's govt. tourism initiative, orchestrating LLM agents via **LangGraph** to serve citizen queries in English and Marathi.
 - Achieved a **70%+ cache hit rate** and **sub-5-second response times** via a 3-tier caching architecture (SQL template, Redis result, semantic cosine-similarity cache).
 - Implemented a **Retrieval-Augmented Generation (RAG)** pipeline with hybrid vector search across **Weaviate** and **Pinecone**, paired with a human-in-the-loop **WebSocket escalation system** for real-time admin handoff.
 - Built a standalone **FastMCP server** exposing a 4-agent workflow (Query, Analyst, Reranker, Evaluator) as reusable **Model Context Protocol** tools, using Gemini embeddings for downstream RAG pipelines.
 - Containerized and deployed the system with **Docker Compose** on **AWS EC2**; stack: Python, LangChain, Supabase (PostgreSQL), Redis.
- Coneixement India Pvt Ltd Pune, India
Full Stack Development Intern Jan 2025 – June 2025
 - Shipped user-facing features for **College Shodh** in **Next.js**, integrating REST API consumption and state management for a live production user base.
 - Designed and built **RESTful API** endpoints in an **Agile** team environment, handling request validation and error states for concurrent multi-user access.

PROJECTS

- Google Drive MCP Server – AI Knowledge Retrieval System GitHub
Python, FastMCP, Model Context Protocol, Google Drive API, Gemini Embeddings, Pinecone 2024
 - Built an **MCP server** enabling AI assistants to securely access and semantically search private Google Drive data.
 - Implemented a two-stage retrieval architecture, folder-level filtering before file-level vector search, cutting the search space before every semantic query and reducing unnecessary vector lookups.
- AI-Powered Resume Screening Assistant GitHub
React.js, Node.js, Python (NLP), Firebase, Razorpay 2024
 - Applied NLP using **BERT** to analyze resumes and job descriptions for semantic similarity.
 - Built the backend in **Node.js**, integrating **Firebase** for auth/data and **Razorpay** for a working SaaS payment flow end-to-end.
 - Secured **3rd place** at **Hacksprints 6.0** among 50+ teams.
- Anonymous Messaging Platform GitHub
Next.js, NextAuth, Tailwind CSS 2024
 - Built a secure, real-time chat system with authentication and role control using **Next.js** and **NextAuth**.
 - Integrated **ChatGPT API** for AI-assisted replies, handling user privacy and concurrency.

LEADERSHIP

- Development Co-Head, Google Developer Student Club 08/2024 - Present
 - Mentored juniors in full-stack development and cloud tools, articulating complex concepts clearly.
- Web Dev Head, NEURA (AI Research Community) 06/2024 - Present
 - Led peer learning sessions on system design, translating GDSC members' project blockers into structured technical walkthroughs.

SKILLS

- Generative AI & LLM Engineering:** LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Multi-Agent Systems, Prompt Engineering, Google Gemini API, FastMCP, Model Context Protocol
- Vector Databases & Embeddings:** Pinecone, Weaviate, Semantic Search, Gemini text-embedding-004
- Core CS Fundamentals:** Data Structures, Algorithms, Operating Systems, OOP, Computer Networks
- Programming Languages:** Python, C++, JavaScript, TypeScript, SQL
- Backend & Infra:** FastAPI, REST APIs, Docker, Redis, PostgreSQL, AWS EC2, Git
- Soft Skills:** Ownership, Technical Communication, Problem Solving, Time Management

ACHIEVEMENTS

- 5-star coder on **HackerRank** in **C++** and **Python**.
- Solved **220+ DSA problems** on LeetCode.
- Secured **3rd place** at **Hacksprints Hackathon** for building AI-powered job matching.
- Certified in Full Stack Development, Docker, React.js, Node.js, Cloud Computing.
